TITANIUM
SERIES

APRESENTAÇÃO

Dia a dia busca-se o aperfeiçoamento do automóvel. São desenvolvidos novos motores mais potentes, leves, econômicos, menores e de maior durabilidade, adequados às necessidades dos consumidores.

Um motor de dimensões menores e com maior potência exige peças compatíveis com suas características. É pensando nisso que a **Veyance Technologies do Brasil**, líder mundial em tecnologia de correias, está constantemente em busca de produtos mais avançados, duráveis e seguros.

As **Correias Automotivas Goodyear Engineered Products** são utilizadas pelos maiores fabricantes de veículos do mundo, sendo projetadas de acordo com as normas técnicas internacionais mais exigentes e produzidas com matérias-primas da mais alta qualidade.

São mais flexíveis, com maior área de contato com as polias, maior tração, menor alongamento, resistentes a óleos, graxas, calor e poeira; proporcionam maior rendimento ao motor, principalmente nas partidas e nas altas rotações.

Neste Catálogo, você vai encontrar informações detalhadas sobre os tipos de **Correias Automotivas**, **Aplicações por Veículo**, **Aplicações por Correia**, **Guia de Solução de Problemas** e **Tabelas de Conversão**.

Ao adquirir uma **Correia Automotiva Goodyear Engineered Products**, você estará recebendo um produto com certificações, o que confirma a excelência do padrão **Veyance Technologies do Brasil** de qualidade.

Fábrica de Correias Automotivas na Rodovia Castello Branco Santana de Parnaíba - SP

Correias Automotivas em "V"

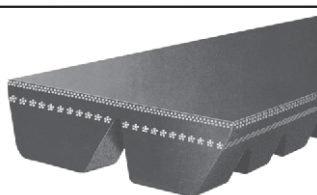

- **1. Dentes Moldados** - Proporcionam maior flexibilidade, maior área de contato com as polias, maior tração na transmissão de HP, dissipam melhor o calor, trabalham com polias menores, transmissões mais compactas e silenciosas.
- **2. Construção "Cut-Edge" (bordas cortadas)** - De acordo com normas técnicas mundiais, proporciona maior aderência da correia à polia.
- **3. Cordonéis de Poliéster** - Alta resistência, menor alongamento, garantem a transmissão integral de potência.
- **4. Elemento Têxtil** - Tecido impregnado com borracha especial para oferecer a máxima resistência contra abrasão.
- **5. Elemento Isolante** - Composto especial de Neoprene®, que mantém os cordonéis ligados ao corpo da correia e evita o escorregamento entre os componentes.

Nomenclatura

Correia: 10 X 0950 • Largura: 9,78 mm • Comprimento: 950 mm

Correias Automotivas "Torque-Team" (duplas)

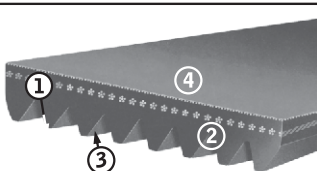

- **Torque-Team** é uma correia tipo "V" ligada, especialmente projetada para lidar com aquelas difíceis e problemáticas transmissões em que vibrações, cargas de choque ou desalinhamento causam o "turn-over" (a correia vira na polia). Problemas dessa ordem não são incomuns no caso de longas distâncias entre centros de polias e/ou também cargas pulsantes, criadas por motores de combustão interna, bombas, compressores ou componentes de motores.

Nomenclatura

Correia: 2 X 13 X 1375 • N° de Correias: 2 • Largura: 29,97 mm • Comprimento: 1375 mm

Correias Automotivas Poly-V

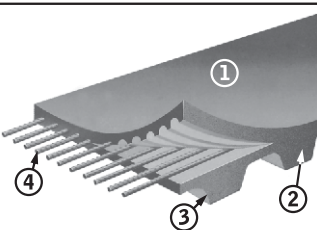

Design de alta eficiência para transmitir potência em espaços limitados a altas velocidades, um produto deve ter encaixe perfeito e contínuo com os canais das polias. Para atender a esses requisitos, as Correias Poly-V apresentam perfil mais baixo e grande área de contato com as polias, permitindo melhor aproveitamento do espaço disponível.

- **1. Cordonéis de Poliéster** - Garantem a transmissão integral da potência, alta resistência, com baixo alongamento.
- **2. Elemento de Compressão** - Composto Wingprene GOODYEAR, resistente à óleos, calor, poeira e abrasão.
- **3. "Ribs"** - Dentes longitudinais com ranhuras diagonais, responsáveis pela transmissão integral da força.
- **4. Top da Correia** - Tecido impregnado com composto Wingprene GOODYEAR, resistente à óleos, calor, poeira e abrasão.

Nomenclatura

Correia: 8 PK 1420 • N° de Ribs: 8 • Perfil Automotivo: PK • Comprimento: 1420 mm

Correias Automotivas Sincronizadoras

**(Positive Drive - Para Comando de Válvulas)**

Em todos os motores a explosão existe a necessidade de sincronizar o movimento do girabrequim com o eixo de comando de válvulas, para que se torne possível seu funcionamento.

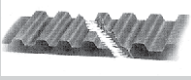

- **1. Resistente ao óleo e ao ozônio.**
- **2. Dentes moldados com precisão.**
- **3. Tecido resistente à abrasão.**
- **4. Cordonéis de fibra de vidro extrafortes e dimensionalmente estáveis.**

Nomenclatura

Correia: 131RH8PN170 HNBR • N° de Dentes: 131 • Perfil do Dente: RH8PN
Largura: 17 mm • Composto da Borracha: HNBR

PROBLEMAS	CAUSAS PROVÁVEIS	SOLUÇÕES
Curta duração das correias.	Polias gastas.	Substituir as polias.
	Óleo ou graxa na correia.	Evite pulverizar o motor com óleos ou querosene. Limpar as polias e correias.
	Desgaste excessivo ou estrias causadas pelo roçar em cortes ou obstrução.	Verificar por onde a correia está sendo atingida por óleo ou graxa. Evite.
	Queimaduras pelo patinar da correia na polia motora.	Retirar a obstrução e realinhar as polias.
Correias com quebra prematura.	Correias danificadas na instalação.	Seguir o procedimento de instalação recomendado.
Correias que viram no canal da polia.	Desalinhamento de polias e eixos.	Realinhar o sistema.
	Polias gastas.	Trocar as polias.
	Vibração excessiva.	Ajustar a tensão.
	Correias gastas com rasgos ou estrias.	Substituir a correia.
Correia com chiado.	Grande carga no arranque ou excessiva sobrecarga.	Ajustar a tensão da correia.
	Surgimento de pó na parte lateral da correia.	Limpar.
Vibração excessiva.	Correias frouxas.	Tensioná-las convenientemente.
	Desalinhamento de polias.	Instalar adequadamente. Alinhar polias.
Desigualdade das correias durante a instalação ou em serviço.	Correias usadas e novas instaladas no mesmo conjunto.	Nunca instalar correias novas com correias usadas.
	Eixo das polias desalinhado.	Realinhar a transmissão.
	Polias gastas ou defeituosas.	Trocar as polias.
Correia quebrada (transversal). 	Presença de corpo estranho.	Verifique se o guarda-pó está montado corretamente.
	Baixa tensão (corre sobre a borda da polia).	Ajuste na tensão recomendada pelo fabricante do veículo.
	Devido à montagem incorreta.	Montar conforme instruções do fabricante do veículo.
Correia quebrada (reto). 	Correia dobrada ou vincada antes ou durante a instalação (devido a manuseio inadequado).	Evite manusear a correia de qualquer jeito (dobrar, vincar, enrolar, reverter dentes para fora).
Dentes arrancados. 	Baixa tensão (devido à montagem incorreta).	Ajuste na tensão recomendada pelo fabricante do veículo.
	Polia travada.	Localize e repare a polia travada.
Contaminação por óleo. 	Vazamento de óleo no motor.	Reparar o vazamento de óleo sobre a correia.
Falha por alta tensão. 	Correia com muita tensão (devido à montagem incorreta).	Ajuste na tensão recomendada pelo fabricante do veículo.
Desgaste nas bordas. 	Flange da polia danificada.	Coloque uma nova polia.
	Polia desalinhada.	Verifique o alinhamento.
Dentes cortados. 	Baixa tensão (devido ao ajuste incorreto).	Ajuste na tensão recomendada pelo fabricante do veículo.
	Tensão de trabalho muito baixa (devido ao ajuste incorreto).	Verifique o funcionamento do tensionador.
Transmissão com ruído. 	Tensão excessiva ou baixa (devido ao ajuste incorreto).	Ajuste na tensão recomendada pelo fabricante do veículo.
	Polia desalinhada ou danificada.	Verifique o alinhamento ou coloque uma nova polia.
